

# KRYPTONITE

## RECOMMENDED GM ALIGNMENT SPECS

These specifications are recommended for ALL HD GM trucks with IFS. Trucks equipped with our control arms can easily achieve this whether stock, leveled, or lifted. This example is based on years of testing and real world use. Aimed to improve handling characteristics and overall drive-ability. If you are running oversized tires, plan to alter ride height, or looking for a stable reliable towing platform. Ride/drive ability can be greatly improved with our line of HD steering and suspension.

All Kryptonite parts are backed with an industry leading lifetime warranty and knowledgeable staff.
